

Procedure to update the INSIGHTqcx Controller Software from versions previous to V2.0.0 to V2.0.7 or V2.0.10 through the Controller Local UI.

Quick 2-step guide:

If updating to version 2.0.7 or 2.0.10 from any released version prior to V2.0.0 the controller has to first be updated to V2.0.0, and then updated to the desired version.

Step1:

1. From the FTP site, download the controller firmware v2.0.0 and v2.0.7 or V2.0.10 (eg: package.irb).
 - a. ftp://ftp.irco.com
User: asSoftwareRead
Password: 4&4erum6?a
 - b. Go to Insight qcx Releases
 - c. You will see directories for Version 2.0.0 and 2.0.7 and 2.0.10
 - d. Open the directories and then open the Application directory
 - e. Download the .irb file
2. On a blank USB key create 2 folders, V2.0.0 and V2.0.7 or 2.0.10.
3. Save the .irb files to the correct folder.
4. To update the Controller firmware, login to the Controller Local UI.
5. Insert the USB drive to one of the Controller's USB Ports.
6. Navigate to the "Menu"  button in the Home screen. Click and select option "System Maintenance-> Firmware Update".
7. Click on "Browse" button for fetching the v2.0.0 IRB file (eg: package.irb) from the Connected USB drive.

8. After getting the file click on download button next to browse button to start Controller firmware update.

9. After successful update, user will be logged out and need to login again by providing the credentials.
10. Login to the controller again and navigate to “Menu” -> About screen.
11. Go to “About” screen and verify the Controller version and related information.

Controller Information	
Model	QCXD0208
Serial Number	A19B00111333
Controller Radio MAC Address	00:12:4B:00:02:5F:FF:FF
SATA ID	181922401189

Controller Version Information		Tool Version Information	
Application Version	2.0.1	Tool Display Version	100.2.1.1
Database Version	0.0.6	Tool MCE Version	2.5.1.0
OS Version	0.0.1	Tool Radio Version	0.0.2.6
Radio Version	02.06		

Step 2

1. Follow steps 4 through 11 above. This time use the .irb file for Version 2.0.7 (or 2.0.10).

Note: The same procedure can be followed if updating from the Web UI. Save the necessary files to the PC and follow the steps 6 through 11 above. Update to V2.0.0 and then to V2.0.7 or 2.0.10.
